The Higgs boson is an elementary particle in the Standard Model of particle physics, produced by the quantum excitation of the Higgs field, one of the fields in particle physics theory. It is named after physicist Peter Higgs, who in 1964, along with five other scientists, proposed the mechanism which suggested the existence of such a particle. Its existence was confirmed in 2012 by the ATLAS ...

Special relativity is a theory of the structure of spacetime. It was introduced in Einstein's 1905 paper "On the Electrodynamics of Moving Bodies" (for the contributions of many other physicists see History of special relativity). Special relativity is based on two postulates which are contradictory in classical mechanics: . The laws of physics are the same for all observers in uniform motion ...

Gas Transition Between Quantum and Classical States. Authors: George Rajna Comments: 52 Pages. A team of researchers from the MIT-Harvard Center for Ultracold Atoms has developed a way to study and measure gases as they transition between quantum and classical states due to changes in temperature. [28]

IBN SINA (AVICENNA). Ibn Sina (Avicenna) (980-1037) is one of the foremost philosophers of the golden age of Islamic tradition that also includes al-Farabi and Ibn Rushd. He is also known as al-Sheikh al-Rais (Leader among the wise men) a title that was given to him by his students. His philosophical works were one of the main targets of al-Ghazali's attack on philosophical influences in Islam.
