PDFCreator is an application for converting documents into Portable Document Format (PDF) format on Microsoft Windows operating systems. It works by creating a virtual printer that prints to PDF files, and thereby allows practically any application to create PDF files by choosing to print from within the application and then printing to the PDFCreator printer.

### **PDFCreator - Wikipedia**

If you've worked with PDF forms, you are probably familiar with radio buttons: There is one problem with radio buttons: When you have a selection that also includes "non of the above", you have to create a separate option for that: A radio button group – once selected – cannot be unselected.
