Mars is the fourth planet from the Sun and the second-smallest planet in the Solar System after Mercury. In English, Mars carries a name of the Roman god of war, and is often referred to as the "Red Planet" because the reddish iron oxide prevalent on its surface gives it a reddish appearance that is distinctive among the astronomical bodies visible to the naked eye.

Mars er en steinplanet som består av mineraler som inneholder silisium, oksygen, metaller og andre elementer som typisk danner fjell. Baneobservasjoner og undersøkelser av meteorittsamlinger viser en overflate sammensatt hovedsakelig av basalt. Noen bevis antyder at en del av overflaten er rikere på silisiumdioksid enn typisk basalt, og ligner andesittiske steiner på jorden.
