THE PROBLEM WITH DANGLING ACTIVITIES - PROJECT RISK

the problem of certainty pdf

Background. The halting problem is a decision problem about properties of computer programs on a fixed Turing-complete model of computation, i.e., all programs that can be written in some given programming language that is general enough to be equivalent to a Turing machine. The problem is to determine, given a program and an input to the program, whether the program will eventually halt when ...

The Problem with Dangling Activities - Project Risk

Overview. Decision-making can be regarded as a problem-solving activity that aims to find a solution deemed to be optimal or satisfactory. It is therefore a process which can be more or less rational or irrational based on explicit or tacit knowledge, beliefs, and objectives. Tacit knowledge, beliefs, and objectives can be used to fill the gaps in complex decision making processes, including ...

That human CO₂ is causing global warming is known with high certainty & confirmed by observations. Skeptics often claim that the science of anthropogenic global warming (AGW) is not “settled”. But to the extent that this statement is true it is trivial, and to the extent that it is important it ...

Is the science settled?
